

# Assured Edge Income Achiever<sup>SM</sup>

A fixed annuity with a flexible guaranteed lifetime withdrawal benefit

## Your guaranteed lifetime income amount

Use the chart to calculate your initial guaranteed lifetime income amount (GLIA) for your Assured Edge Income Achiever fixed annuity. The initial GLIA is determined by multiplying your eligible premium by the income percentage indicated for your age, or the age of the younger person if two covered persons. A change in covered person(s) may increase or decrease the GLIA. Please note that percentages are subject to change before the contract issue date.

\$100,000 Eligible Premiums	×	6.30% Single Coverage	=	\$6,300 Initial GLIA
-----------------------------------	---	-----------------------------	---	----------------------------

### Here's an example of how the calculation works:

Your guaranteed lifetime income amount will increase by an income credit which is a dollar amount that is determined by multiplying the 7.5% income growth rate by the initial GLIA; it is then added to the GLIA each year until you activate lifetime income withdrawals.

### Annual fee for the guaranteed lifetime withdrawal benefit (GLWB)

The annual fee is 0.95% of contract value and is deducted on each contract anniversary. It is subject to change before the contract issue date but once your contract is issued, your fee is guaranteed not to change.
